DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 101-110 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 101-110 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are:

Independent claim 101 requires substantially identical 1st and 2nd links, but has no requirement that the cover member extend past the connecting channel of the extension element on either end -- the cover member requires only apertures on its side portions that align with the connecting channel of the extension element of the same link. Without a requirement that the second cover member extend over a portion of the first extension element with the joining channel, or a requirement for some sort of apertures in the cover member to correspond to the joining springbars, the claim does not convey essential structural cooperative relationships of elements so that one of ordinary skill in the art could make and use the invention. How does the joining springbar join the first link to the substantially identical 2nd link when neither is required to overlap, have a cover member extending out past the extension element of the same

link, have a cover member with apertures for the joining springbar, or otherwise allow connection?

Claims 102-110 are rejected as depending from claim 101.

Allowable Subject Matter

3. Claims 75-100 are allowed. Examiner notes that the specification and drawings make clear that the “substantially” identical 1st and 2nd links have the same structure, and “substantially” is used to allow for normal manufacturing and material tolerances.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
